Instructor

Focus

Global Bike

Version

4.3

MOTIVATION

This document provides you with a brief overview of the innovations that were implemented with the version change from 4.2 to 4.3.

This document mainly contains the changes relevant for teaching. For reasons of clarity and comprehensibility, minor bug fixes are not listed in detail.

S/4HANA 2022

The S/4HANA with Global Bike 4.0 was developed on an S/4HANA 2020 system. Global Bike 4.1 was also based on the same S/4HANA version, and for 4.2, we updated to 2022 version. In Global Bike 4.3, we are now switching to an S/4HANA 2023 in order to be able to use the latest functions.

In addition to the new opportunities this brings, a variety of other projects are underway in which experts from the community are extending functionality for the community, creating localizations, and designing new educational content.

Key Features in Global Bike 4.3

Note The model company Global Bike is an essential part of an application-independent teaching and learning platform.

This release is influenced by SAP's strategy on its S/4HANA Compatibility Packs. These packs are non-permanent license models to facilitate the transition to S/4HANA for customers. This allowed functions from older SAP solutions to be continued. However, the Compatibility Packs will expire on December 31, 2025.

Cross-Component

- Adjustments to SAP S/4HANA 2023 FPS 3
- Activation of Enterprise Search
- “App-grades” across all case studies
 - Several app update to the latest version
 - Replacement of WebGUI apps and apps affected by compatibility packs
- Various Monitor corrections
- Correction of various bugs

Navigation

- Rework and reactivation of the SAP Enable Now learning tours
- New learning material regarding Spaces & Pages in SAP Fiori

Sales and Distribution (SD)

- The creation of the business partner (BP) has been removed from the SD case study and transformation to a separate case study.
- Both case studies (BP and SD) can still be carried out as a single unit.

Production Planning and Execution (PP)

- Due to the expiry of the compatibility packs, Sales and Operation Planning (SOP) has been removed from the PP case study.

Human Capital Management (HCM)

- Due to the expiry of the compatibility packs, some content had to be removed from the HCM I case study.
- Activation of the H4S4 bridging technology
- Rework and expansion of the HCM II case study (ESS Payroll scenario)

Customer Service (CS)

- Rework of slides: Focus on Service Management
- Service management case study (bike rental) is now part of this module.

NEW: Environment Health Safety (EHS)

- Publication of the module (including teaching materials) over the course of the last year

NEW: Integrative Case Study “Logistics” (MM, PP, SD)

- New case study with a highly integrative character, starting with a customer inquiry to manufacturing to billing, including procurement
- Recommended for advanced users

NEW: Authorizations Module

- New teaching materials, including a new space in the Fiori Launchpad
- Introduction to roles and authorizations
